

## CALL FOR SPONSORS

As a sponsor, your organisation will be recognised through co-branding on all SAUC-E publicity including the official website <http://www.sauc-europe.org/>, posters, brochures/flyers and banners during the competition itself. We are open to suggestions from organisations interested in becoming actively involved in SAUC-E '12.

The NATO Undersea Research Centre (NURC) in conjunction with its Platinum sponsorship partner ONR GLOBAL and Premier partner ONR US, is once again hosting SAUC-E in La Spezia, in July 2012. The 2011 competition attracted 10 teams from all over Europe, all of which have already indicated interest in participating in next year's competition. SAUC-E '11 was widely covered in the international media, and we expect more publicity for SAUC-E '12. The competition is also the subject of an ongoing EU project application.

# SAUC-E 2012 La Spezia 6-13 July 2012

The Student Autonomous Underwater Challenge Europe (SAUC-E) programme is recognised as an event that fosters innovation and enthusiasm in underwater technology among college level students. SAUC-E provides opportunities for teams to put their engineering projects to the test, running missions under realistic conditions.
